<h1 style="background-color:#966;">Cats!</h1>
```

```
<h2 style="background-color:#568;">Cats are so cool I want to share all this information with
you </h2>
```

```
<a href="https://www.pexels.com/cat/search/html/">See pictures of cats!</a>
```

```
<h3 style="background-color:pink;">Cat Facts</h3>
```

```
<p style="background-color:pink;">Cats cannot see objects less than six inches from their
face</p>
```

```
<p style="background-color:pink;">When cats go to catch objects their whiskers flex forwards in
order to see how close the object is. <a href="https://youtu.be/mdqBbvYX3MU/">Here's a video
that goes more in depth!</a></p>
```

```
<p style="background-color:pink;">Cats can live two to sixteen years in the wild</p>
```

```
<p style="background-color:pink;">Cats have been domesticated for over four thousand years.
Once valued for their hunting ability they are now wanted for companionship.</p>
```

```
<p style="background-color:pink;">The collective noun for cats is called a clowder and the
collective noun for kittens is called a kindle.</p>
```

```
<p style="background-color:turquoise;">Cats have a reflective layer in their eyes, known as the
tapetum lucidum.</p>
```

```
<p style="background-color:turquoise;">Cats have thirty-two muscles in their ears (humans only
have twelve)</p>
```

<p style="background-color:turquoise;">Cats rub against humans and scratch us as a form of communication. They have scent glands in their cheeks and paws so they're just marking us as their territory.</p>

<p style="background-color:turquoise;">The largest breed of cat is the Maine Coon. Males can regularly weigh up to twenty-six pounds! They look like this </p>

<p style="background-color:turquoise;">When your cat's tail is up it means it's comfortable and confident in its surroundings.</p>

<p style="background-color:turquoise;">According to The Huffington Post cats typically sleep for 12 to 16 hours a day. SUPER COOL AMAZING LINK WOW </p>

<p style="background-color:orange;">When cats hit you with retracted claws, they're playing, not attacking.</p>

<p style="background-color:orange;">They are crepuscular, which means that they are most active at dawn and dusk.</p>

<p style="background-color:orange;">Cats make very little noise when they walk around. The thick, soft pads on their paws allow them to sneak up on their prey — or you!</p>

<p style="background-color:orange;">Each cat's nose print is unique, much like human fingerprints.</p>

<p style="background-color:orange;">Cats' collar bones don't connect to their other bones, as these bones are buried in their shoulder muscles.</p>

<p style="background-color:orange;">Your cat drapes its tail over another cat, your dog or you as a symbol of friendship.</p>

<p style="background-color:orange;">Cats are very fussy about their water bowls, and some prefer to ignore their bowls entirely in favor of drinking from the sink faucet.</p>

<p style="background-color:limegreen;">Cats have contributed to the extinction of 33 different species.</p>

<p style="background-color:limegreen;">A cat's purr vibrates at a frequency of 25 to 150 hertz, which is the same frequency at which muscles and bones repair themselves.</p>
